PEDESTRIAN HYBRID BEACON

High-Intensity Activated Crosswalk

Pedestrian Hybrid Beacon

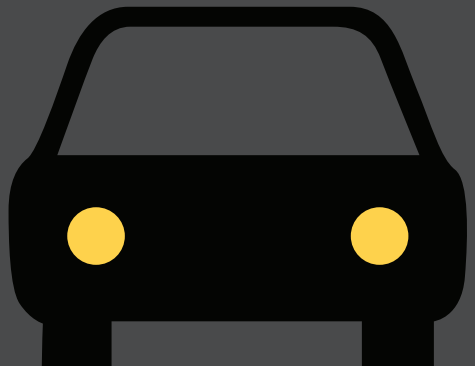
No Regrets When You **DRIVE WITH CARE & CROSS WITH CARE**

High-Intensity Activated Crosswalk Operation Guide for Drivers and Pedestrians

STEP 1

Drivers will see all indication lights are dark when there is no pedestrian waiting to cross, and the pedestrian signal will maintain a “DON’T WALK” symbol.

Pedestrians who want to cross the street will need to push the button to activate the system.



DRIVERS

SEE & DO

Proceed with Caution

beacon normally dark

PEDESTRIANS

SEE & DO

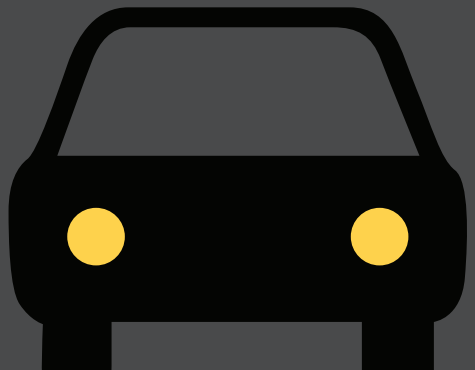
Push the Button to Cross

activates the system

STEP 2

Drivers will see a FLASHING YELLOW light for a few seconds when pedestrians push the button. Drivers should reduce speed and prepare to stop.

Pedestrians will still see the “DON’T WALK” symbol and should wait.



DRIVERS

SEE & DO

Slow Down

flashing yellow light
pedestrian has activated the system

PEDESTRIANS

SEE & DO

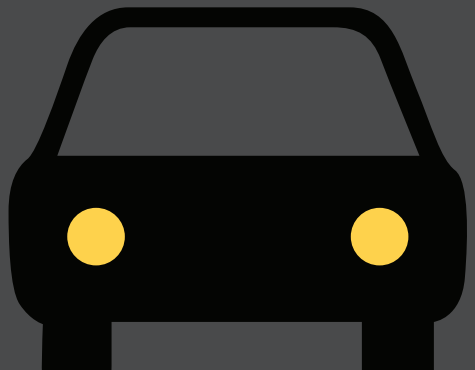
Wait!

traffic is slowing down

STEP 3

Drivers will see the flashing go to a STEADY YELLOW light, warning them the indication will soon turn to a STEADY RED light.

Pedestrians continue to see the “DON’T WALK” symbol and should remain waiting.



DRIVERS

SEE & DO

Prepare to Stop

steady yellow light

PEDESTRIANS

SEE & DO

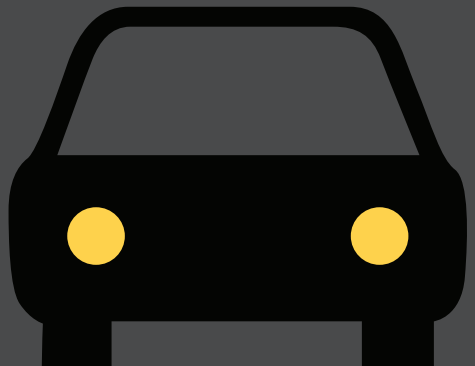
Continue to Wait

traffic is preparing to stop

STEP 4

Drivers will see a STEADY RED light, which requires them to STOP at the stop line.

Pedestrians will then see a “WALK” symbol to cross and should look in both directions to make sure all vehicles are stopped.



DRIVERS

SEE & DO

Stop!

steady red light

pedestrians/bicyclists are in the crosswalk

PEDESTRIANS

SEE & DO

Start Crossing

look in both directions

make sure all vehicles are stopped

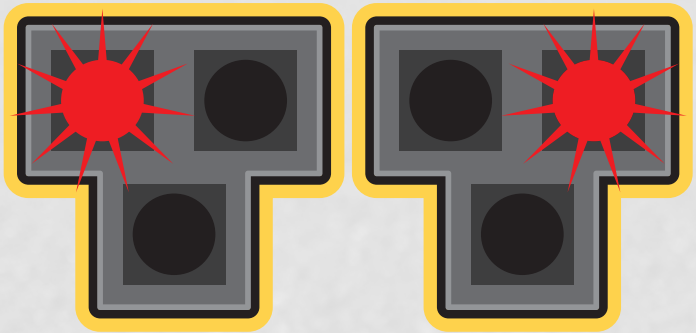
STEP 5

Drivers will see ALTERNATING FLASHING RED lights, as pedestrians cross the street. During this period, drivers are required to STOP and then they may proceed with caution if crosswalk is clear.

Pedestrians will see the WALK indication change to a flashing countdown that indicates how much time they have remaining to cross the street.

DRIVERS

SEE & DO



Stop!

flashing red light

proceed with caution
if crosswalk is clear

PEDESTRIANS

SEE & DO

Continue Crossing

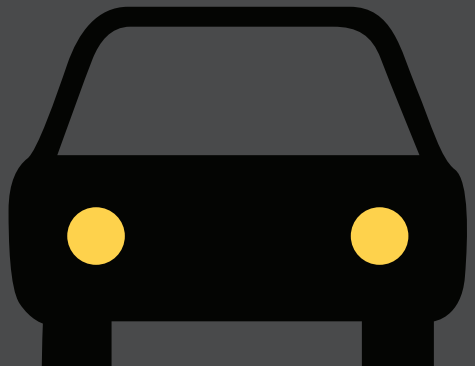
hand flashing

signal will count down
remaining time

STEP 6

Drivers will see all lights are back to dark at the end of the flashing countdown and may continue to proceed through the crosswalk if it is clear.

Pedestrians will see the “DON’T WALK” symbol and must push the button to activate the system again.



DRIVERS

SEE & DO

Proceed with Caution

beacon normally dark

PEDESTRIANS

SEE & DO

Push the Button to Cross

activates the system
